455,000 people hosting over 1,391,000 git repositories

jQuery, reddit, Sparkle, curl, Ruby on Rails, node.js, ClickToFlash, Erlang/OTP, CakePHP, Redis, and [many more](#)

git `\ˈɡɪt\`

Git is an extremely fast, efficient, distributed version control system ideal for the collaborative development of software.

git·hub `\ˈɡɪt,hʌb\`

GitHub is the best way to collaborate with others. Fork, send pull requests and manage all your **public** and **private** git repositories.

Plans, Pricing and Signup

Unlimited public repositories are **free!**

Free public repositories, collaborator management, issue tracking, wikis, downloads, code review, graphs and much more...

Reliable code hosting

We spend all day and night making sure your repositories are **secure**, **backed up** and **always available**.

Team management

30 seconds to give people access to code. No SSH key required. Activity feeds keep you updated on progress.

Code review

Comment on changes, track issues, compare branches, send pull requests and merge forks.

Open source collaboration

Participate in the most important open source community in the world today—online or at one of our meetups.
